

# **Emblem Restorations**

Call for details 440-209-0792

Emblems In Stock

**EMBLEMS** are our business. They are usually found on antique, classic and collector cars, but they can also be found on boats, airplanes, motorcycles and many other places for decorative effect. Over the years we have remained the only source for many rare automotive emblems. Our restoration services are restricted to two kinds of emblems: the enamel or cloisonné emblem, made of copper and glass, which is commonly found on pre-war cars; and the clear top plastic insert emblem, (the modern equivalent of the enamel emblem), which is found on the post-war car.

#### **EMBLEMAGIC** is unique for several very important reasons:

- > Emblems are our only business
- ➤ Old world craftsmanship; individual attention to every emblem until its completion
- ➤ Highest quality materials; enamels, plastics, and finish plating are the finest available
- More than 10 years experience in this highly specialized field

Because our emblem restorations are unsurpassed, we are the first choice for both the professional and hobbyist restorer. We also stock these two types of emblems. Our enameled emblems are guaranteed originals that are expertly restored. Our plastic insert emblems are reproductions that are produced exclusively for us in UV stable, impact, and chemical resistant Polyurethane.

The enameled emblem restoration can start with your original, or one of ours. We take the emblem, strip it of its enamel and plating, clean, repair, and refurbish it with all new enamels and finish it off with professional plating. The emblem is then ready to be reattached to the car.

**The plastic insert emblem** can be ordered from our comprehensive list of hard to find emblems. If your emblem can not be found on the list, we may be able to reproduce it, using your original emblem as a pattern. Our reproduction emblems come with a money back guarantee and a 1-year warranty.

#### What kind of emblem is it?

**That** is always our first question. Is it metal or plastic? Is it a logo or crest, or is it a nameplate or script? Out of the many varieties of emblems that exist, we can help with only two. If the emblem appears to be made entirely from plastic, see "Plastic Inserts" for a more complete description. On the other hand if the emblem is metal, and has colored inlays, see "Enameled Emblems" for more details. If your emblem does not fit either of these two categories then we regret that we will not be able to help at all.

#### **Enameled Emblems**

This type of emblem has a metal base of copper, which is usually plated with chrome, nickel, or gold and is inlaid with enamel colors. They were used on almost all cars until the 1940's, and were found on the radiator grille, headlight bars, hubcaps, trunk racks, spares, sidemounts, and inside on the dash or steering wheel. Enamel emblems continue to be used on a number of

European cars. Other examples include auto club badges, hat badges, key fobs, and many types of jewelry.

Enamel is technically glass. Enamel emblems that are deteriorating may have plating that has faded or pitted, or the inlaid colors begin chipping out like little bits of glass or plastic. If the colors have faded, then this is paint and not enamels, even though some paints are called enamels. The metal will either be copper, or very rarely, German silver. On some emblems the metal may appear to be brass, but this is also not likely.

Our restoration service for enameled emblems includes minor metal repair or straightening, attachment of studs, replacement of enamel and replating. Our service is unmatched for several important reasons. We use only the same lead-bearing enamels that were originally used. Government regulations outlawed the manufacture of lead-

bearing enamel decades ago. We have stockpiled many of these rare and often costly enamels in order to match the original colors. Our finish plating is of the highest quality and done professionally by our plating specialist. Each emblem receives our own time proven, proprietary techniques developed specifically for the antique automotive type emblem.

Before we can give you a quote on any restoration, we must see the actual emblem. Pictures, copies etc. will not help. Your cost may be reduced if you have any extra emblems that can be used as 'trade-ins' for their core value. Call for further details.

#### **Plastic Inserts**

This type of emblem is made from a clear plastic, which appears to have its design, and colors imbedded inside. The underside of this emblem is an embossed or detailed surface in relief, which is usually coated a solid color. This type of emblem first appeared in the late 40's and continues to be used on cars today. It is usually mounted in some sort of metal bezel or opening, which is chrome or gold plated. They are

found on the car's hood, trunk, quarter panels, hubcaps, steering wheel, and almost anywhere else for decorative effect. Deterioration in this type of emblem is usually due to the flaking off of paint on the underside of the emblem, or sometimes colors fade away. The clear plastic may also develop crazing or hairline cracking.

If you can not locate your emblem on our price list, restoration may be possible.

Restoration on a plastic insert emblem cannot remove the cracking or crazing visible inside the plastic material, and in fact, will sometimes aggravate the situation. Reproduction is almost

always preferred as a restoration solution. Reproduction of a plastic insert emblem must always start with a good original. This means that the part should be whole, without warpage, or other severe defects to the plastic itself. Internal cracking or crazing, as well as **minor** chipping, or loss of color in the original part, will usually make a satisfactory pattern. We begin by first stripping, cleaning and polishing the original. The mold that is created from this pattern will pick up every detail, no matter how minute. Next, a new part is cast from a space age UV STABLE POLYURETHANE plastic. And finally the part is colored and plated to match the original emblem. **All of this work is done by hand**, in a slow, painstaking process, unlike the original mass produced emblem. The result is virtually an exact replica. The original pattern emblem becomes the property of EMBLEMAGIC, unless it is to be restored as part of the order.

**Prices:** Emblems listed under Restored Enamel Emblems are subject to availability. Call to reserve your emblem before ordering. Prices are subject to change without notice. Prices listed are for single emblems unless stated otherwise. Prices do not include shipping or tax (if applicable). We are happy to give you a no-obligation quote on your emblem restoration, but please call first, to verify that we can handle your type of emblem.

**Terms:** Cash, check, or money order, paid in full, with order on "in stock" items. Restorations and custom crafting orders require a minimum 50% deposit with the order. The balance must be paid when the item is ready to ship, or upon receipt of the invoice.

**Delivery & Shipping:** Delivery will be stated at the time the order is placed. All original customer emblems are shipped U.S.P.S INSURED. All other emblems are mailed 1st class. Any other shipping method should be arranged at the time of placing the order.

**Shipping Cost:** \$8.00 minimum per package shipped within the U.S.

PLEASE CALL before shipping us any emblems for estimates or returns.

**Liability:** Limited to the dollar amount of the order, and only in the event of the emblem's loss while in our possession. **This does not include shipping loss.** 

**Returns:** On <u>restorations</u>, whether enameled emblem or plastic insert, we will be very specific in what you can expect. In some cases, we can not predict the outcome. Generally speaking if the first restoration results are unsatisfactory, another attempt will almost always result in a further decline. For <u>emblems in stock</u> there is a 100% satisfaction guarantee, or simply return the emblem, within 10 days (in the same condition), for a complete refund. See your work order for complete terms and conditions.

**Hours:** Our regular customer service hours are from 9:00 AM to 5:00 PM, Eastern Standard Time, Monday through Friday. If you get the voice mail system when calling, please give us a number where you can be reached during business hours.

## **Enameled emblems:**

The badges shown on the following page represents just a sample of the type of enameled emblems that we stock and restore, and were in stock at the time of this printing. If we don't have your emblem listed, call, as we may have it in our unrestored stock. We will also allow a trade-in allowance for extra emblems such as these that you may have, toward the price of a restoration. See our website for the latest additions to stock.
